Reader's guide

The annual report 2014 renders account of the implementation of the policy as recorded in the budget for that year.

<u>Chapter 1</u> is a brief introduction, containing inter alia the result and inter alia a first overview of the main functions.

<u>Chapter 2.1</u> contains the justifications per main function. In Chapter 2.2 the policy developments raised within that main function in the course of the year are briefly discussed.

In <u>Chapter 3</u> you will find the mandatory paragraphs that have to be included in the financial statements according to the Budget and Accountability Decree public entities BES (BBVBES).

You will find the balance sheet with explanatory note in <u>Chapters 4.1, 4.2, 4.3 and 4.4,</u> respectively. Chapter 4.1 (balance sheet) contains a schedule specifying the assets and linked to it the maximum depreciation period per type of asset. The ultimate breakdown of all main functions and functions was included in the financial statements under <u>Chapter 4.5</u>. You will also find the budget figures with the main functions here, as well as the most important explanations. You can find the figures for the cost center in <u>Chapter 4.6</u>, as well as the budget figures with the cost center. In <u>Chapter 4.7</u> you can find the overview of income and expences from the main functions based on economic categories.

In the Chapters 4.8 - 4.12 you can find the following overviews:

- 4.8 Overview special-purpose grants/advances received
- 4.9 Overview of use of the item contingencies
- 4.10 Overview General Cover Funds
- 4.11 Overview General remarks General Cover Funds
- 4.12 Overview primitive budget and budget changes

The schedules have been inserted in the back of the book under the Chapter ANNEXES.

Annual report

1 Introduction

You are looking at the annual report 2014 of the Public Entity (PE) of Saba. In line with the financial statements since 2011 we made an effort again to get an unqualified audit opinion with regard to the true and fair view and also on the regularity of the data presented. The financial statements meet the requirements set in the BBV BES.

The previous statement of 2013 closed with a positive result of \$ 1.674,117 and 2014 was also a stable year from a financial perspective, with a positive result of \$ 1.809.457. How this result has come about is further explained in the annual report and financial statements.

In 2014, the customary financial documents were submitted to the Board for Financial Supervision ("Cft") and the Ministry of the Interior and Kingdom Relations ("BZK"). Per quarter, *inter alia* an overview is presented in which the realized and expected income and expenditure are checked against the budget figures. If applicable, the budget is modified accordingly. The budget changes for the first three quarters of 2014 were approved by Cft and BZK.

Inter alia the following events took place within the departments of the PE Saba:

- An external employee in the Civil Affairs Department is writing the necessary policy documents and advises and supports the staff, if necessary.
- A staff member was employed and trained at the Finance Department.
- Several projects are under way in the social domain. These are inter alia projects in the context of poverty reduction and combating youth unemployment, the coaching and rehabilitation of (young) convicts, the project supervisor plus.
- The departments responsible for the investments in the context of the infrastructure carried out projects such as the Cove Bay playground, resurfacing and maintenance to various roads and the street lights project.
- The project for strengthening of childcare on the island was continued into the year 2014.
- (Life-prolonging) maintenance took place to inter alia the community center, the harbor, the Windwardside library and clinic, the day care center, the museum, the Queen Wilhelmina Park and the sports field.
- The airport staff completed the final course necessary to keep their license as Aerodrome Flight Information Service Officer (AFISO).
- Three persons from the airport Security Department completed Aggression Replacement Training (ART).
- Beside the investments in the context of (life-prolonging) maintenance of buildings and infrastructure, several other investments were made. Examples hereof are the purchase of Hyacinth's Cottage in connection with the Revitalization of the Windwardside Project (parking lot), purchase of a new school bus and purchase of a small car for the Employment Opportunities project. In addition, street lights were installed in several places, including "antique" street lights. In order to keep the computerization quality at a certain level, hardware and software were purchased as replacement and expansion. Additional camera surveillance equipment was also purchased in order to update the existing camera surveillance system for the continued protection of the harbor. An investment was also made in speed bumps in order to upgrade road safety on the island.
- Investments were made in a recycle plant in the Fort Bay in the location of the existing garbage dump site. This was realized by special funding from the Ministry I&M. The project is continued and will be finalized in 2015.

 An agreement was concluded with the Ministry of Education, Culture, and Science ("OCW") in 2013 for an interest-free loan. The money of the loan and an additional special-purpose grant are used and accounted for by the Government Buildings Agency for the renovation and expansion of the school buildings at St. John's.

In 2014, several Ministers, State Secretaries and high level civil servants from the Netherlands visited Saba. In addition, the Executive Council participated in the discussions between government bodies in the context of the Dutch Caribbean week in the month of June.

Policy-related basis

In the budget year 2014, the Island Council approved investments not expected in the initial budget and the proposed budget changes in connection with the quarterly reports. These budget changes were also approved by Cft and BZK. This is further explained in the explanation of the balance sheet. You can find a breakdown of the investments made in 2014 in the annexes under "capitalized capital expenditure".

Financial developments

Looking back, much was achieved in 2014, and the year is closed with a positive financial result of \$ 1.811.574. In the following overview the result is further substantiated. The Island Council will decide on the appropriation of the result when it adopts the financial statements 2014. Despite the large positive result of this year, the PE has to continue to handle the finances carefully. There are no problems with regard to income and expenditure, but in order to guarantee the necessary liquidity in the years to come, considerable positive results remain necessary, this is also necessary in order to be able to meet (repayment) obligations.

General reserve

After processing the result of 2013, the general reserve is \$ 4.587.819. It will be proposed to the Island Council what to use the result of 2014 for, separate from the annual report and accounts. In order not

to anticipate this, in the following table the result is indicated as a memorandum item for the time being. As in previous years, it is emphasized that the general reserve cannot be freely disposed of, because this capital is mainly tied up in the noncurrent assets. These assets cannot simply be converted into cash.

In the section concerning the buffer capital we indicate that our reserves and provisions have to be handled carefully in the years to come, and that we have to get them at such a level that the buffer capital grows in time to the necessary level of \$ 2.000.000.

The course of the general reserve is as follows:

Algemene reserve voor en na resultaatbestemming (bedragen in USD)		
Saldo 1 januari 2014		2.913.702
Rekeningresultaat 2013	+	1.674.117
Saldo 31 december 2014		4.587.819

Appropriated reserve buffer capital

In 2012 a deposit of \$ 435,000 was made in the appropriated reserve buffer capital. This reserve is the first step to giving the necessary buffer capital extra volume. No changes occurred in this reserve in 2014.

The course of the reserve buffer capital is as follows:

Reserve weerstandsvermogen (bedragen in USD)	
Saldo op 1 januari 2014	
Mutaties 2014	
Reserve weerstandsvermogen per 31 december 2014	435.000

The course of the appropriated reserve capital charges is as follows:

Bestemmingsreserve (bedragen in USD)	
Saldo op 1 januari 2014	1.099.669
Onttrekking reserve t.b.v. afschrijvingen	-128.109
Bestemmingsreserve per 31 december 2014	971.560

Appropriated reserve capital charges:

The appropriated reserve is annually withdrawn in part to cover the capital charges.

Provision bad debts

In financial statements we also include a provision bad debts for possibly uncollectible debts. Each year it is considered per debtor whether or not the debt will be paid as yet. Depending on this, a deposit in and/or a withdrawal from this provision will take place each year. In 2014 outstanding debts were written off for the period 2009 – 2013. We will concretely pass to a stricter collection policy in the course of 2015, in which much stricter internal controls will be placed on the collection of income whereby there will be consequences to non payment.

The course of the provision bad debts is as follows:

Voorziening dubieuze debiteuren (bedragen in USD)		
Saldo op 1 januari 2014	31.043	
Onttreking ter deking van oninbare vorderingen	-18.818	
Reservering t.b.v. mogelijke oninbare vorderingen	5.625	
Voorziening dubieuze debiteuren per 31 december 2014	17.850	

Appropriated reserve maintenance costs

In the third budget change of 2013, the Island Council agreed to reserve the budgets not completely spent as yet on renovation of the agriculture building, the library in the Windwardside and the houses of the housing association for 2014. An appropriated reserve maintenance costs was consequently created for this purpose.

The course of the fund maintenance costs is as follows:

Bestemmingsreserve onderhoudskosten (bedragen in USD)		
Saldo op 1 januari 2014	146.000	
Aanwending reserve in 2014	-29.996	
Saldo per 31 december 2014	116.004	

The positive result of \$ 1.809.457 has mainly come about by incidental factors and by careful execution of the budget and capitalization of the investments. In exchange for the 3.1% participation in the Naamloze Vennootschap Gemeenschappelijk Electriciteitsbedrijf Bovenwindse Eilanden (GEBE), liquid assets in the amount of \$ 6,200,000 were received. To cover the expected future losses of the new energy company namely, Saba Electric Company N.V. (SEC), in which the PE has a 100% participation, a provision has been set up in the amount of \$ 4.700.000 . The total result created by this is \$ 1.500.000. Another provision in the amount of \$ 1.266.092 has been set up to cover the pension commitment to current and former persons in authority. In order to be able to pay back the interest free loans and other commitments a positive result was budgeted in the amount of \$ 780.197. The remaining result of almost \$ 800.000 is the result of the careful execution of the budget and capitalization of the investments. Paragraph 4.5 of the financial statements gives the explanations per main function.

Saba July 6, 2015

The Executive Council of the Public Entity of Saba

Saldo Lasten	9.464.780	12.272.586	15.820.820	-3.548.234
	1.674.117	0	-1.809.457	1.809.457

We refer you to paragraph 4.5 for the deviations from the figures realized and the figures estimated. The positive result of \$ 1.809.457 has mainly come about by incidental factors and careful execution of the budget and capitalization of the investments. Because the investments led to expenses but not to burdens in the year of purchase, this is the main reason of the large positive result.

2.2 Policy intentions and realizations

General

In the last year, policy attention was mainly paid to the elaboration and implementation of the comprehensive development plan of the PE. To accomplish an improvement of the well-being and prosperity of the Saban people, the local economy should be strengthened. As shown in the overview of the local levies, only a very limited part of the total funds required for the islands tasks is generated by the revenue of the island itself. Therefore, it is evident that the self-reliance of the island needs to be increased. Investments to make the local economy grow are absolutely necessary to improve the social cohesion of the population.

In 2014 financing was a problem however interest free loans were applied to tackle the parking problem and the traffic flow on the Windwardside and the elimination of overdue maintenance of the Fort Bay Road. With the cooperation of BZK it was possible to get an advance on the free allowance so that we could start working early 2015 with the realization of the parking lot in the Windwardside.

In the audit report to the financial statements, attention is once again drawn to the liquidity position in the long term. At present, the PE is not able to comply with its long-term commitments. Therefore, the elimination of backlogs can only be financed by means of special-purpose grants, in principle.

Main function 0: Personnel and training

In 2014 the funds of the social safety were used for training of several departments.

Main function 0 through 9: Maintenance costs

In the past years and also in 2014, a lot of overdue maintenance to the buildings, the roads and the retaining and safety walls has been caught up.

Also, the PE started in 2014 in cooperation with the Livability Fund to contribute to the overdue maintenance to the houses of the housing association 'Own Your Own Home Foundation'. This Foundation manages a number of houses in the social sector, but the Foundation cannot perform properly because an adequate housing benefit system is lacking.

Main function 2: Seaport

One of the priorities of the development plan is the elimination of the overdue maintenance to the "wet" part of the harbor. This concerns the overdue maintenance to the piers and quays and the harbor basin has to be restored to the depth required by means of dredging. In 2014 we could not realize any progress on these maintenance plans because it is not possible without the financial assistance of the Kingdom.

To make the harbor hurricane-resistant, investments by the Kingdom will be necessary. If this does not take place in the near future, the piers could be washed away by the waves during the next big storm. The Kingdom will then be confronted with very high expenses, and the island will depend on emergency relief and assistance of inter alia the Royal Netherlands Navy for the necessary supplies.

Main function 5: Promotion of tourism

The promotion of tourism - as one of the two pillars of the local economy – was a key policy objective and will be in the next years as well. A tourist promotion committee is working together with government officials to get Saba known globally.

Main function 7: Waste collection levy

In the end of the past year, we were able to implement the waste collection levy. The collection is taking place simultaneously with the monthly bill for the consumption of electricity issued by the Saba Electric Company.

Main function 9: Taxes and levies

Local income shows an upward trend (also see the paragraph "Local Levies") because of the rates of the motor vehicle tax and the airport surcharge. The waste collection levy was introduced in mid November 2014.

Balance sheet position: Investments versus liquidity position:

In the management letter to the financial statements 2013, the auditor emphatically advised to keep a close watch on the liquidity position because the long-term liquidity position, taking into account the outstanding claims and debts, is not sufficient to be able to pay all outstanding debts. A disadvantage of the accrual accounting system compared to the budget system on a cash basis is that a balanced budget does not mean, by definition, that it can also be financed in terms of cash in hand. The two most important disturbing factors are, first of all, the investments and depreciations, and secondly, the (interest-free) loans and repayments.

In an ideal situation, the total amount of the annual depreciations would be approximately equal to the investments. If, however, the amount of the investments exceeds the depreciations, cash in hand must be available for that excess amount. This means that, if in any year the intended investments exceed the depreciations in that year, less expenses can be budgeted, to create a positive result to finance the investments.

3 Mandatory paragraphs

3.1 Local levies

The local levies in 2014 increased by \$ 146.084 compared to 2013 and amount to \$ 819,037. This is less than initially estimated and caused by the fact that the introduction of the waste collection levy took place in mid November. Furthermore there has been a change in how the construction levies are calculated and in addition the fisherman sheds were not rented out until the end of 2014, which was later than previously estimated.

Below you will find an overview of the levies received in 2014. As a comparison, the table also contains the figures of 2013.

Levy	Budget	Realisation	Realisation	Difference 2014-2013	
	2014	2014	2013	Plus	Minus
Motorijtuigbelasting	130.000	136.812	114.469	22.343	
Havengelden	80.000	103.947	64.329	39.618	
Erfpacht/Verhuur	115.000	63.303	58.037	5.266	
Logeerbelasting	60.000	72.250	73.790		1.540
Kinderopvang	45.000	49.962	45.276	4.686

Handel en Industrie	50.000	57.127	63.327		6.200
Horecavergunningen	60.000	73.979	75.222		1.243
Verkoop zaden gezondheidscertificaten/sale Animal Feed	-	12.863	-	12.863	
Total	877.000	819.037	672.953	163.949	17.865
Total Difference 2014 - 2013					146.084

There is no policy (as yet) for remissions.

Motorijtuigbelasting: The realization figures for the local levies for motorijtuigbelasting increased by \$22.343 in comparison to the figures of 2013 due to the raise in the fee for the year 2014.

<u>Havengelden</u>: The realization figures for the local levies for the harbor dues increased in 2014 by \$39.618 in comparison to the figures of 2013 due to the rental income of the newly built fishermen sheds and dive center shops as well as the raise in the departure fee as of March 2014.

<u>Luchthaventoeslag en landingsgelden</u>: The realization figures for the local levies for the airport increased in 2014 by \$ 62.544 in comparison to the figures of 2013 due to the increase in the departure fee as of March 2014.

3.2 Buffer capital

Introduction

In the adopted memorandum (2013) by the Island Council, inter alia, the following risk areas with a high risk profile were established on buffer capital:

- energy prices;
- investments in communication infrastructure;
- social housing and other social provisions;
- pension plan former persons in authority;
- public health risks;
- damage to government buildings.

It was decided during the discussion of the memorandum that the Executive Council would further substantiate the risks financially, and would establish the maximum financial impact of the risk when possible. We will further discuss the financial substantiation of the risk hereinafter.

Theoretical calculation method

A generally accepted calculation method is to establish an estimated maximum financial scope of the risk per risk factor, and the chance in percentages that this risk can occur. By multiplying the scope by the chance in percentages, theoretically the necessary buffer capital per risk can be established. The disadvantage of this calculation method is that notably the chance in percentages that a risk occurs is not very high. For instance, the chance of a government building being destroyed is lower than 2% (this has not happened in the past 50 years). This theoretical calculation method might lead to too little buffer capital being accrued, so that in the event of an unlikely calamity insufficient funds are available to repair the damage suffered.

Alternative calculation method

A more pragmatic approach is verifying which of the recognized risks will lead to the greatest financial impact when it actually occurs. The Executive Council has established that the highest financial risk is destruction of a building by fire. The buildings with the highest estimated reconstruction value are the airport building and the school buildings. The financial means necessary to rebuild the airport building or the school buildings is estimated at \$ 2 million.

This pragmatic approach assumes that not all risks will manifest themselves at the same time. With a maximum buffer capital of \$ 2 million, the starting point is that all identified risks can be covered. If the buffer capital drops below the target figure of \$ 2 million because a certain risk occurs, it has to be brought back to the desired level as soon as possible.

Buffer capacity

The existing buffer capacity consists of the item contingencies in the budget, (hidden) reserves, and the unused capacity of local levies. The (general) reserve cannot be converted into cash, because it almost entirely consists of the capital tied up in the noncurrent assets. Furthermore, an increase in the local levies in not possible due to the high cost of living in Saba. This means that the existing buffer capacity is very small.

Advocated approach

In order to increase the buffer capital of currently \$ 435,000 to \$ 2 million, a multi-year approach is necessary. By continuing the current policy of annually carefully estimating the budgets, it is possible to add the positive results thus created (in part) to the reserve buffer capital. Each year it has to be considered whether the general reserve and the appropriated reserve capital charges are high enough

Page 19 of 80

compared to the noncurrent assets. Each year when the financial statements are made, the Executive Council will make a proposal to the Island Council what part of the result has to be added to the general reserve and what part to the buffer capital.

3.3 Maintenance capital goods

By far the most important capital goods of the Public Entity consist of roads, buildings and retaining walls, and the infrastructure of the seaport and airport. In the budget 2012, we already indicated that the spearhead for the policy of the years 2012-2015 is handling the arrears in maintenance of the capital goods. The special-purpose grants and part of the free benefit are used for this purpose. This task was begun expeditiously in 2012. In 2014 again big steps were taken; for a breakdown of the various investments, we refer you to the annex capitalized capital expenditure at the end of this report.

Beside the arrears in maintenance, you will also find other investments made in 2014 in this annex. You will find all investments 2014 in the column investments 2014. If the Netherlands made a special-purpose grant available, the coverage of the investment can be found in the column "contributions third parties", debited against this special-purpose grant.

A master plan was developed for the airport under the direction of the ministry of Infrastructure and the Environment (I&M), which will be implemented in 2015. It was also agreed with I&M that after the master plan has been implemented, a maintenance plan will be delivered.

There are maintenance plans for the buildings, roads, retaining walls and seaport, which are the basis for the budget for maintenance costs each year. However, as long as the amount of the free allowance is not adjusted, the PE cannot carry out the necessary maintenance on the seaport.

The Public Entity's policy is based on carrying out just sufficient maintenance so as not to cause arrears in maintenance. However, this policy cannot be pursued with regard to the seaport, because the PE does not have the funds necessary for it.

3.4 Management

The process of separation of responsibilities within the primary processes – in as far as possible in a small organization –, has resulted in a working internal audit function.

In 2014 the funds received in the context of the social safety net were used to train and professionalize various departments. These efforts will be continued as much as financially possible during 2015. In the past year, much was achieved with regard to improvement of the infrastructure, which is notably evidenced by the continued increase in the balance item noncurrent assets.

In cooperation with the Cft, again, some priorities were set for the improvement of the financial management for 2014. These priorities were almost completely aimed at the anchoring of the financial lawfulness requirements in the setup of the organization. The objective of the Public Entity in this respect is that the regularity of the financial management is an integral part of the primary processes. With an unqualified audit opinion with regards to truth and fairness and regularity, the Public Entity considers the improvement process of the financial management to be completed. In 2015 attention will be given to the remaining remarks in the management letter of the auditor.

In the opinion of the Public Entity, the quality of the management and the extent to which the business processes are controlled is at an adequate level.

3.5 Participations

The situation of the participations has changed. In 2014 all movable and immovable objects connected with the location of GEBE in Saba were transferred to SEC free of charge, as well as liquid assets in the amount of \$6,200,000. The participation in NV GEBE was transferred to the government of the country St. Maarten.

SATEL N.V.

The Public entity has a 100% participation in SATEL NV and the issued and paid-up capital of SATEL NV is \$ 55,866. The place of domicile is Saba in accordance with the Articles of Incorporation. SATEL NV has the purpose of providing telecommunication services against payment.

A dividend policy was established for SATEL NV in 2012. The dividend to be paid annually consists of a fixed component in the amount of an interest payment in respect of the invested capital and a variable component depending on the operating results and prognoses for the future of the corporation. One endeavors to pay the shareholder approximately 50% of the net profit as total dividend. The minimum

dividend for 2014 (8% of share capital) for Satel was booked as a "yet to be received income" due to the companies high expenses throughout 2014 (repairs and maintenance of equipment destroyed in the storm at the end of the year 2013).

Saba Bank Resources N.V.

The Public entity has an interest of 21.67% in Saba Bank Resources NV in the amount of \$ 12,104. The place of domicile is Saba in accordance with the Articles of Incorporation.

Saba Bank Resources NV has the exclusive right to research and extract petroleum on the Saba Bank and can conclude agreements with third parties for this purpose. It can also grant permits for conducting merely scientific research. The largest share in Saba Bank Resources NV was owned by the former country Netherlands Antilles (Land NA), and in connection with the division of joint property passed to the Kingdom as legal successor of Land NA. After the division of joint property has been completed, it has to become clear what the joint opinion on this participation is.

Ontwikkelingsbank Nederlandse Antillen (OBNA)

Saba has a 3.8% participation in the capital of the OBNA, the issued capital and capital paid up by Saba is \$ 279,330. The place of domicile is Saba in accordance with the Articles of Incorporation. OBNA promotes the realization of projects important to the development of the (former) Netherlands Antilles and pursues a balanced development of these islands.

The largest share in OBNA was owned by the former Land NA and in connection with the division of joint property passed to the Kingdom as legal successor of Land NA. After the division of joint property has been completed, it has to become clear what the joint opinion on this participation is.

GEBE/SEC.

The Public entity has a 100% participation in Saba Electric Company N.V. (SEC). The amount of the shares is \$ 3.000. This company was established on the expense of the GEBE Shareholding Foundation. All movable and immovable objects connected with the former location of GEBE in Saba were transferred to SEC free of charge, as well as liquid assets in the amount of \$ 6,200,000. A provision is taken for the expected future losses of SEC in an amount of \$ 4.700.000.

The 3.1% participation in NV GEBE was transferred to the government of the country St. Maarten in exchange for objects and liquid assets.

3.6 Land policy

As 96% of the land on the island of Saba is privately owned, the policy for the other land is limited. The income in 2014 from land issued in long lease was \$ 11,882 and from renting out buildings and parcels of land \$ 52,231.

There are still plans to sell the land around the former Captains Quarters.

The transaction of exchange of land and the building of the fire station for the land of the government and archive building with adjacent parking spaces was formalized in 2014. The exchange did lead to a payment to the PE of the excess value of \$ 127,000. Also two pieces of land are bought to build a parking lot in the Windwardside.

3.7 Collective sector

In cooperation with the Dutch Central Bureau of Statistics, the Board for financial supervision mapped out the collective sector of the Public entity. Beside the Public entity itself, the collective sector consists of the Saba Enhancement Foundation. The purpose of the Foundation is to use the funds for the promotion of the island in the broadest sense of the word and for infrastructural projects to improve and embellish the island, on instructions of the Executive Council of the Public entity.

The Foundation receives its income from a fixed amount per liter of fuel sold on the island by the local fuel supplier(s). The income and expenditure of the fund have shown the following picture in the past 3 years:

	2012	2013	2014
Income	53.969,50	58.034,33	60.404,68
Expenditure	73.194,79	64.227,42	65.484,82
Saldo	- 19.225.29	- 6.193.09	- 5.080.14

The Foundation has no debts at all and will never incur debts either, because the objective is only to make payments for which funds are available from the current or closed financial years. That in the past three years a negative balance was created between the income and expenditure is because considerably more income was received than payments made in the previous years. The equity capital of the Foundation at the end of 2014 was \$ 24,000.

Summary of Significant Accounting Policies

Assets

In as far as not stated differently, the assets were valued at acquisition price or manufacturing cost. The acquisition price includes the purchase price and the additional costs. The manufacturing cost includes the purchase cost of the raw materials and auxiliary materials used and the other costs that can be directly allocated to the manufacture. Noncurrent assets with a limited useful life are annually depreciated in accordance with a system adjusted to the expected future useful life. Depreciations take place independent from the result of the financial year. An asset taken out of use is decreased in value when it is taken out of use if the residual value is lower than the book value. Decreases in value of noncurrent assets expected to be permanent will be considered independent from the result of the financial year.

Tangible noncurrent assets

The tangible noncurrent assets were valued at acquisition price or manufacturing cost, minus the depreciations and/or contributions of third parties (in as far as there is a direct relationship with the asset). Land issued in long lease was valued at the price of the first issue. The land issued on lease in perpetuity was valued at registration value. Tangible noncurrent assets with an acquisition price lower than \$5,000 are not capitalized. Depreciation on noncurrent assets with a limited useful life take place annually in equal parts in accordance with a system adjusted to the expected future useful life. The depreciation method has been further recorded in the financial management ordinance adopted by the Island Council pursuant to Art. 34 of the Act Finances public entities BES.

Depreciation table

In these financial statements you will find a depreciation table in accordance with the terms as prescribed in the financial management ordinance.

Afschrijvingstabel investeringen	Termijn in jaren		
Gronden en terreinen	0		
Wegen	50		
Gebouwen	40		
Vervoermiddelen	5		
ICT middelen	5		
Meubilair	5		

Financial noncurrent assets

Capital provisions, other long-term loans, and other deposits are valued at acquisition price with deduction of repayments, if any. In deviation from this, participations are valued at market value, if this value is lower than the acquisition price. Deposits are understood to be shares, bonds, but also loans and claims. Deposits with a term less than two years are included in the current assets. Deposits with an original term longer than two years will be included in the financial noncurrent assets during the entire term. Provisions for bad debts will be set off against the nominal value of loans.

Receivables

The claims have been valued at the nominal value. Provisions for bad debts are set off against the nominal value of the claims.

Cash and Cash Equivalents

The cash and cash equivalents have been valued at the nominal value.

Page 30 of 80

Accrued income

The accrued income has been valued at the nominal value.

Liabilities

In as far as not mentioned differently, liabilities have been valued at the nominal value.

Equity capital

The equity capital consists of the reserves and the result for the year, following from the statement of income and expenditure.

General reserve

General reserves are reserves that have not been given a specific purpose as yet by the Island Council.

Appropriated reserves

Appropriated reserves are reserves that have been given a specific purpose by the Island Council. The method of appropriating a result as known from the Provinces and Municipalities (Budgets and Accounts) Decree ("BBVpg") used by Netherlands authorities was not directly copied in the BBVBES mainly because administrative simplicity is preferred. The result has to be included inter alia as a separate section of the equity capital. Movements in appropriated reserves will normally by nature be a result of the appropriation of profit and consequently they are not hard income or expenses. However, reserve movements have to be shown in function 910 based on the functional classification established by ministerial regulation. By the introduction of the BBVBES, consequently an independent framework for the modified income and expenditure system was created for the Public Entities. During 2013, the Public Entity of Saba decided to create an appropriated reserve maintenance costs because it already appeared during the interim reports that there would be underspending of these items in the budget. Article 49 of the BBVBES provides the opportunity of reserve movements already taking place before the distribution of profit from the result. Because the legislator did not give an unambiguous definition of "modified income and expenditure system" and because the classification of the budget and the financial statements have to be identical according to BBVBES, the movement of the appropriated reserve was processed in these statements as a charge or release through function 910, in line with the adopted budget change. The reserve movement is also processed gross, to stay in line with the starting points of Article 2 of BBVBES.

Currency conversion

The financial statements are in dollars, which is the functional and presentation currency of the Public Entity of Saba. During the first processing, a transaction in foreign currency is valued at the functional exchange rate on the transaction date. Monetary balance items in foreign currency are converted into the functional exchange rate on the balance sheet date. Exchange differences occurring in the processing or conversion of monetary items in foreign currency are processed in the statement of income and expenditure.

Bases for the determination of the result

The financial statements were prepared in accordance with the principle of the "income and expenditure system" (baten-lasten-stelsel). This system allocates income and expenditure to the years they relate to. Income is understood to be the income directly attributable to the year, which can be considered realized in the year. Anticipated income has not been accounted for as income to be on the safe side. Expenditure is determined with due observance of aforementioned bases for valuation and allocated to the year under review they relate to. Income is accounted for in the year in which the goods were delivered or the services were performed. Losses are considered in the year in which they are anticipated.

4.2 Explanation assets

Tangible noncurrent assets

In 2014, tangible noncurrent assets were depreciated in conformity with the table shown with the bases of valuation. Several investments were added to the various parts of the tangible noncurrent assets in 2014 as well. They include investments financed by means of a special-purpose grant from the Netherlands. These investments were also capitalized first, and subsequently depreciated through "contribution of third parties" in the customary way. Finally, an amount was included in "other tangible noncurrent assets" that corresponds with the special purpose grant from the Ministry of I&M granted for the Recycle Project. The project is still ongoing and expected to be completed by mid year 2015. Only when the whole project has been completed will the amount be transferred to the item buildings and will the investment be depreciated. Below you will find the most important investments and movements in the separate sections within the tangible assets. We refer you to the annexes for a further breakdown of these investments. You will find the breakdown per section in paragraph 2.

	Boekwaarde I	nvesteringen	Verminderingen	Bijdragen	Afschrijvingen	Cumulatieve	Aanschaf	Aanschaf	Cumulatieve	Boek waarde

Financial noncurrent assets

The situation of the participations has changed. In 2014 all movable and immovable objects connected with the location of GEBE in Saba were transferred to SEC free of charge, as well as liquid assets in the amount of \$6,200,000. A provision is taken for the expected future losses of SEC to an amount of \$4.700.000. The participation in NV GEBE was transferred to the government of the country St. Maarten.

	<u>2014</u>	<u>2013</u>
Satel N.V.	55.866	55.866
OBNA	279.330	279.330

Overige Vooruitbetaalde Bedragen	348	-
Totaal vooruitbetaalde bedragen	50.542	314.390

Provision for bad debts

The provision for bad debts was used in 2014 to write off debts that have appeared to be impossible to collect. In the course of 2015, a stricter collection policy will be used, so that write off of claims is reduced as much as possible. As in previous years, the total amount of the accounts receivable was analyzed and an additional allocation was made, so that the height of the provision corresponds with the amount of debts that possibly cannot be collected at the end of 2014.

Breakdown other claims

	2014	<u>2013</u>
Ingehouden voorschot Salarissen	62.566	53.248
Netto salaris	78	548

Te vorderen bijz uitkering Amfo en Usona	44.200	63.520
Totaal Overlopende activa	191.277	167.923

Currently there are no outstanding claims to be collected.

Cash and Cash Equivalents

	<u>2014</u>	2013
Bank	199.982	199.974
Betalingen onderweg incl. afrondingsverschillen	595 -	805
Kas	2.390	2.390
Rekening Courant Cft	3.106.228	1.436.249
Deposito Rekening Courant CFT	1.311.958	179.026
Totaal	4.621.153	1.816.834

Compared to 2013, the total of cash and cash equivalents has increased. This is mainly due to the special purpose grants and free benefit received in advance from the Netherlands whereby the projects have not as yet started.

4.3 Explanation liabilities

Equity capital

General reserve

During the year, the result of 2013 was added to the General Reserve. As a consequence, the general reserve is now \$ 4.587.819. No further movements took place in the general reserve in 2014. In the following table you will find the course of the reserve.

Algemene reserve voor en na resultaatbestemming (bedragen in USD)		
Saldo 1 januari 2014		2.913.702
Rekeningresultaat 2013	+	1.674.117
Saldo 31 december 2014		4.587.819

Appropriated reserve capital charges

This reserve is meant to be able to absorb the depreciation costs as a result of the inventory of the assets in 2011 within the budgets and the financial statements. Compared to the opening balance sheet of 2014, a withdrawal took place to cover the capital charges of 2014. The balance as per December 31, 2014 is \$ 971.560.

The course of the reserve is as follows:

Bestemmingsreserve (bedragen in USD)	
Saldo op 1 januari 2014	1.099.669
Onttrekking reserve t.b.v. afschrijvingen	-128.109
Bestemmingsreserve per 31 december 2014	971.560

Appropriated reserve buffer capital

No movements took place in this reserve in 2014.

The course of the reserve is as follows:

Reserve weerstandsvermogen (bedragen in USD)	
Saldo op 1 januari 2014	435.000
Mutaties 2014	0
Reserve weerstandsvermogen per 31 december 2014	435.000

Appropriated reserve maintenance costs

In the third budget amendment 2013, the Island Council agreed to make an allocation to reserve maintenance costs for 2014. In conformity with this change, a new appropriated reserve maintenance costs was created. The balance of this appropriated reserve brought forward per December 31, 2013 was \$ 146.000. The below shows costs incurred during the year 2014 and released from the reserve.

The course of the appropriated reserve fund maintenance costs is as follows

Bestemmingsreserve onderhoudskosten (bedragen in USD)	
Saldo op 1 januari 2014	146.000
Aanwending reserve in 2014	-29.996
Fonds infrastructurele werken per 31 december 2014	116.004

Result 2014

The financial statements 2014 close with a positive result of \$ 1.811.574. The Island Council will decide on the appropriation of the result on the proposal of the Executive Council.

Debt with a long term exceeding 2 years

You will find an overview hereof in the following table:

	<u>2014</u>	<u>2013</u>
Schulden met een looptijd > 2 jaren		
Doeluitkering BZK	247.281	370.921
Tekortreeks BZK	106.741	160.111
Renteloze lening OCW 2012-2016	640.000	650.000
Pensioenen Politieke Gezagdragers	1.266.092	-
Vooruitontvangen Vrije Uitkering	960.000	-
Totaal Schulden met een looptijd > 2 jaren	3.220.114	1.181.032

Special-purpose grant BZK

The special purpose grant received in 2013 from BZK has to be paid in 5 equal annual installments. The total amount received is \$ 618.202 whereby no interest is due on the amount. The first payment of \$ 123.640 was due in 2014. You will see the remaining 2/5 of the total claim being \$ 247.281 is shown and the remainder, \$ 247.281, can be seen under debts with a term less than two years (< 2 years).

Deficits BZK

The total deficit amount owed to BZK in the amount of \$ 266.851 will be paid in 5 equal annual installments. No interest is due in respect to this amount. The first installment fell due in 2014. You will see the remaining 2/5 of the total claim being \$ 106.741 is shown and the remainder, \$ 106.740, can be seen under debts with a term less than two years (< 2 years).

Interest-free loan OCW 2012-2016

In 2013, an interest-free loan of \$1,300,000 was entered into with the Ministry of OCW for the (partial) financing of the project school accommodation. The first repayment of \$130,000 took place in 2013. Therefore, a debt of \$1,170,000 was still outstanding on the loan as of 1 January 2014. Repayment of this amount is scheduled over 5 years (shown below) and will be offset via the free benefit. An additional amount of \$250.000 was added to the interest free loan in 2014 for the improvement of the road infrastructure by the school. This additional amount will be repaid over two years, namely 2019 and 2020, in the amount of \$125.000 annually and will also be offset via the free benefit. The free benefit gross will continue to be presented within the operating statement.

For the years 2015 through 2020, the repayments are the following:

2015	\$ 260,000
2016	\$ 260,000
2017	\$ 260,000
2018	\$ 130,000
2019	\$ 125.000
2020	\$ 125.000

In conformity with the rules, you will find under debts with a term > 2 years the balance of the loan in respect of the years 2017-2020 being \$ 640,000. In conformity with the rules, you will find the other \$ 520,000 under debts with a term < 2 years.

Pensioenen Politiekegezagdraggers:

A provision was set up in the amount of \$ 1.266.092 to cover the pension commitment to current and former persons in authority.

Vooruitontvangen Vrije Uitkering:

An advance on the future free benefit (vrije uitkering) was received in the amount of \$1.200.000 and was obtained under the name of "Revitalization of the Windwardside Project", which is for the construction of a parking lot in the Windwardside. The amount will be settled through 10 equal installments starting in 2015.

Current liabilities

The balance of the debts wit a term of less than 2 years

You will find an overview hereof in the following table:

VLOTTENDE PASSIVA	<u>2014</u>	<u>2013</u>
Schulden met een looptijd < 2 jaren		
Crediteuren	191.846	766.641
Renteloze lening OCW 2012-2016	520.000	520.000
Tekortreeks BZK	106.740	106.740
Reservering vakantie geld	188.445	148.315
Credit card betalingen in omloop	639	639
Af te dragen Pensioenpremie	25.038	32.128
Doeluitkering BZK	247.281	247.281
Totaal Schulden met een looptijd < 2 jaren	1.279.989	1.821.744

Creditors

This includes as per the balance sheet date the invoices to be paid and written off in the course of the first quarter.

Reservation vacation pay

This is the amount reserved in respect of the year 2014 through the payroll administration and to be paid at the time of the payment of the vacation pay in 2015.

Credit card payments in progress

This concerns a purchase by credit card, which was not collected by the credit card company in the course of 2014. In the event it is still not collected during the course of 2015 this amount will be written off.

Pension contribution to be paid

This is the pension contribution of the payroll administration that will be settled as yet in 2014.

Overige Schulden

This mainly consists of salary advances that will be cleared in 2015.

Accruals and deferred income

You will find an overview hereof in the following table:

	<u>2014</u>	<u>2013</u>
Overlopende Passiva		
Nog te betalen bedragen	45.268	117.850
Voorschotbedragen bijzondere uitkeringen	1.785.257	-
Beklemde Vrije Uitkering	1.311.958	-
Vooruitontvangen Vrije Uitkering	240.000	
Totaal Overlopende Passiva	3.382.483	117.850

Amounts to be paid as yet

You will find an overview hereof in the following table:

	<u>2014</u>	2013

Playground OYOHF	6.000	-
	45.268	117.850

Advances special-purpose grants

In this item, the income is shown that provides financial cover over several years within each individual financial year. The costs incurred during the financial year and falling under the purpose of the grant are covered by annually writing off part of the special-purpose grant in favor of the operation and/or investment. Below you will find the total of the various special-purpose grants.

Voorschotbedragen Bijzondere Uitkering	Begin balans	Ontvansten	Uitgaven	Saldo
	2014	2014	2014	2014
	1.109.282	3.392.687	2.863.787	1.638.181

In the annexes, you will find the total overview of the special-purpose grants. As you can read in the table above and in the annex, the overview closes with an amount of \$ 1.785.257 on the liability side. The debit side of the balance sheet shows an amount of \$ 147.077 which relates to the Queen Wilhelmina Park upgrade and the 'Juridische Ondersteuning Gezaghebber'.

4.4.1 Off-balance sheet items

In the annual report of last year a possible claim of \$ 588,245 was mentioned. In concurrence with BZK we have an agreement to no longer include this as a liability. There are no other significant off-balance sheet items.

4.4.2 Subsequent Events

There are no known events after balance sheet date.

4.5 Budget and realization figures main functions

In this Chapter you will find the figures of the main functions of the year 2013, the budget 2014, the realization 2014, and the difference between the budget 2014 and realization 2014. We also explained the most important deviations in outline per main function and per income and expenses.

The most important deviations within the functions are:

60011000 Island Council and council committees

In 2014 more was spent on travel expenses in comparison to the expenses in 2013. A portion of the salary costs of the Registrar was covered by the WOLBES funds (see also the credit side). The small overspending on the budget is due to the salary harmonization October 2014.

60013000 Executive Council

In 2014 more was spend in comparison to 2013 however costs were less than budgeted. The underspending is mainly caused by the lower salary costs, less was spent than estimated. In addition, more was spent on maintenance on buildings, as the costs for the monthly maintenance of the Lieutenant-Governor's garden were under estimated. More telephone expenses, office and other material expenses were also incurred and therefore more was spent than budgeted.

60021002 FEZ/Finances and Economic Affairs

In 2014 the overall budget was underspent. This is mainly due to underspending on travel costs, office supply costs and training costs. Less was also spent in comparison to 2013 which was mainly due to the finalization of the Interim Managers contract in April 2014. Due to the harmonization of salaries more was spent in the areas of salaries than budgeted.

60021007 Automation

In 2014 there was more spending in comparison to 2013 mainly due to the hiring of an external consultant for the betterment and upgrading of our IT Department. The underspending of the budget is mainly in the area of software and salary costs.

60021006 Personnel Affairs

In 2014 the overall budget was overspent due to the salary harmonization as well as staff gratifications.

60021008 Census Office

The budget of the Census office was underspent due to a staff member leaving during the course of the year and the vacancy not being filled.

The most important deviations within the functions are:

60020000 Property Management

The increase in 2014 in comparison to 2013 is mainly due to the rental of the fishermen sheds and dive shops in the last quarter 2014.

60011000 Island Council and council committees

The budget is lower in comparison to 2013 mainly due to the training costs for the registrar which took place in 2013 and was covered by special grant funds.

60013000 Executive Council

Under this function the income from the Netherlands for legal support for the Lieutenant-Governor is found as well as covering for the salary costs of the legal advisor which was covered by the WOLBES funds. In addition, money was also received for the CN weeks in the Netherlands, these funds were over budgeted therefor created the difference shown in the table above.

60021002 FEZ/Finances and Economic Affairs

There was less income in 2014 in comparison to 2013 due to the fact that the interim manager from NL is no longer there. These costs were covered by special grant funds therefor you no longer see the income from the special grant.

60021006 Personnel Affairs

The income under this function is covering from the Social Vangnet for the training of the new salary administration personnel.

60021008 Census Office

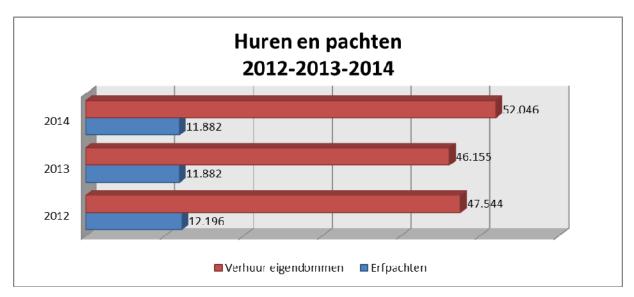

The overall income for passports, identity cards, marriages and other charges increased in 2014. You will also find here the covering for the external consultant which is covered by special grant funds.

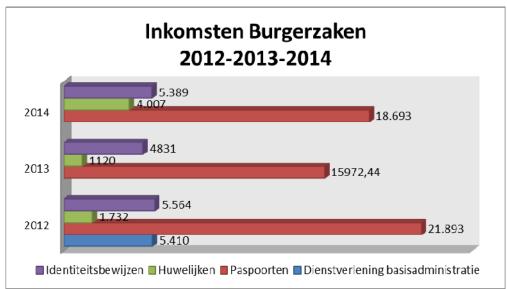

600210012 Housing Costs

The income for 2014 decreased in comparison to 2013 due to the moving of the ZVK office to another location therefore rent is no longer collected.

60022000 Other issues

On the debit side costs were incurred for legal support. The income from a special-purpose grant from the Netherlands had not been estimated. We consequently see extra income under this item.

4.5.2 Main function 1 Public Order and Safety

In this function you will now see the income and expenses for the Disaster Management Funds which are special grant funds from the Netherlands

The most important deviations within the functions are:

62100000 Roads, streets, etc..

Although the total budget is less than the figures of 2013 the budget has still been overspent. This is mainly due to the harmonization of salaries in October 2014 as well as paid gratifications.

62200000 Operating contributions concerning seaports

The budget is underspent and this is mainly because of underspending in salaries.

62300000 Other matters concerning aviation

The budget is underspent and this is mainly due to underspending in salaries.

2. VERKEER, VERVOER EN WATERSTAAT Total	200.077	288.507	317.304	28.797	

The most important deviations within the functions are:

62200000 Operating contributions for seaports

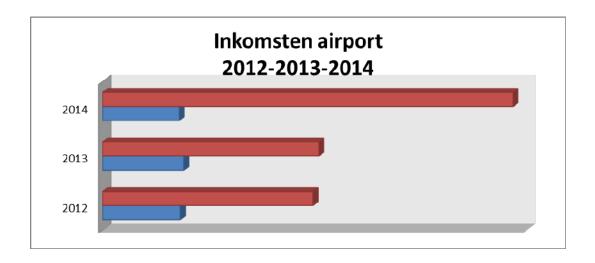

The income has increased due to the rental of the fishermen's sheds and dive shops during the last quarter of 2014.

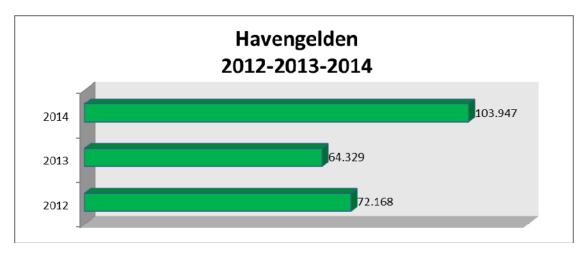

62300000 Other matters concerning aviation

The revenue from stamps and landing charges was higher than estimated and compared to 2013 the revenue has increased.

Explanation of overview harbor/airport dues

Due to stricter internal controls on the collection of income during the year 2014, income has increased both at the harbor and airport. Due to ongoing internal controls the amount should stabilize as it is now.

4.5.4 Main function 3 Economic Affairs

63100000 Trade and industry

For the second year in a row, no expenses were incurred from this budget.

The most important deviations within the functions are:

64110006 Foundation Early Childhood Care

The overspending on this budget is due to the salary harmonization in October 2014.

64800001 Vervoerskosten

The budget is overspent mainly because of the salary harmonization in October 2014 and also due to more vehicle maintenance cost than what was budgeted.

64800007 Education Department

The budget is mainly underspent due to the depreciation budget being overestimated as well as underspending in the telephone, office supply and other small areas.

64800003 Study funds etc.

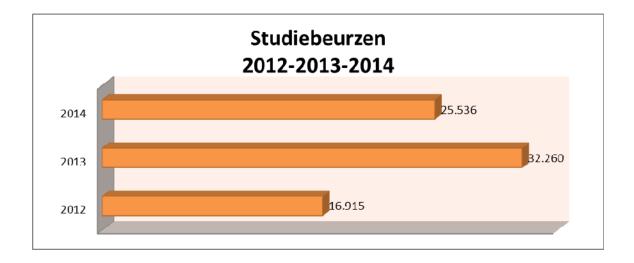

Less is spent on this function than estimated. The expenses decreased in comparison to last year.

5. CULTUUR EN RECREATIE Total	752.071	845.638	750.050	95.588

The most important deviations within the functions are:

65100000 Libraries and reading rooms

The debit side shows a slight overspending in the subsidies due to an underestimation in connection with the vacation pay of the library staff as well a an underestimation in the purchasing of materials for the library. The costs for the purchasing of materials are covered from a special-purpose grant from the Netherlands. See also credit side.

65300001 Outdoor sports accommodations

The costs estimated for the sports coach were not completely spent due to his early departure. This means that the special-purpose grant was not fully used either. See also credit side.

65410000 Archeology/museums

The budget is mainly underspent due to the overestimation of the subsidy amount.

5. CULTUUR EN RECREATIE Total	49.911	45.603	41.618	-3.985

The most important deviations within the functions are:

65100000 Libraries and reading rooms

The credit side shows a substantial difference between the years 2014 and 2013. This is due to the fact that the majority of the digitalization of the archives and purchasing of new books and magazines took place in 2013 with the special grant funds from the Netherlands. The special-purpose grant has not completely been depleted as yet. See also debit side.

65300001 Outdoor sports accommodations

This covers a part of the electrical upgrading of the sports field which was in part covered by the Donner funds as well as the special purpose grant for the sports coach which has still not been depleted. See also debit side.

The most important deviations within the functions are:

69100000 Reserves and provisions

Under these functions, the reservations for the budgets 2014 are shown. Below is specified the main postings to these budgets:

A special reserve for the pension of the current and former political authorities was created and booked to this budget in total amount of \$ 1.255.785;

A provision for future loses for SEC was also created and posted here for the amount of \$ 4.700.000.

69220000 General expenses/income

Provisional sums were hardly used, so that this part shows underspending.

The item contingencies were not used for the third year in a row.

Although there was a Collective Labor agreement signed in 2014 which caused an overspending in salaries the item *cost of living* was not further translated into the other budgets or used.

Payments took place under the building maintenance budget for the renovations of the Own Your Own Home Foundation social housing in the Range.

Repairs to the tower on Mt. Scenery were started in last quarter of 2014. These costs are covered by special purpose funds from the Netherlands. See credit side.

Invoices of previous years that had not been paid and/or estimated earlier were booked under *miscellaneous expenses*.

69920000 Balance ordinary service

The budget was not used.

9. FINANCIERING EN ALGEMENE DEKKINGSMIDDELEN Total	9.866.359	9.460.459	15.802.807	6.342.348

The most important deviations within the functions are:

69100000 Reserves and provisions

On the credit side, entries were made in the context of the coverage of the capital charges. This income comes from the appropriated reserve.

69200000 Taxes

The taxes for the hospitality industry and room tax were higher than budgeted however slightly lower compared to the figures of 2013. The income of the motor vehicle tax was in line with the budgeted amount but significantly higher compared to 2013.

69220000 General expenses/income

- Due to the unexpected high cost for repairing of equipment of SATEL after the damage in 2013 it was decided to only book the minimum dividend of \$ 4.469.
- The income from the <u>free benefit</u> is in keeping with the estimate and the latest statements of the Cft. As can be seen in the table above.
- Repairs and maintenance was started on the Mt. Scenery tower at the end of 2014. You will see under the other receivable from the Netherlands the special purpose funds for the repairs and maintenance to the tower.
- You will see under other income the funding for the exchange of the fire station and the land situated behind the government administration building (parking lot/archives) in the amount of \$ 260.393.
- Also under this post is included the amount of the transfer of liquid assets, in the amount of \$ 6.200.000, for the dissolving of Naamloze Vennootschap Gemeenschappelijk Electriciteitsbedrijf Bovenwindse Eilanden (GEBE). In exchange for the 3.1% participation shares the liquid assets were received in 2014. To cover the expected future losses of the new energy company namely, Saba Electric Company N.V. (SEC), in which the PE has a 100% participation, a provision was set up in the amount of \$ 4.700.000. Therefor the total result created by this is \$ 1.500.000.

Overview General Income

Vrije Uitkering	8.822.864
Sale Fire Station	260.393
Sale GEBE	6.200.000
Other Income	78.404
Total Income	15.361.661

4.6 Budget and realization figures cost centers to be divided

In this Chapter you will find the figures of the cost centers of the year 2013, the budget 2014, the realization 2014, and the difference between the budget 2014 and realization 2014.

Explanation:

The lower realization of the salaries and social insurance charges with the general administration is caused inter alia by the salary costs of the Registrar and legal adviser being charged (in part) to the special-purpose grant WOLBES. The lower realization of other goods and services under traffic, transportation and water management is related to capitalization of maintenance to infrastructure. The overpayment in this function and Education comes from the salary harmonization and gratifications.

4. ONDERWIJS Total	287.571	305.409	317.357	11.948

Explanation:

The higher realization on transfers under traffic, transportation and water management is due to stricter controls implemented in the collection of fees as well as the rental income of the fishermen sheds and dive shops.

* Negative amounts under Queen Wilhelmina Park Upgrade and Juridische Onders	steuning Gezaghebbe	r are presented as	receivable in the b	palance sheet.		

Below you will find a brief explanation of the most important special-purpose grants

WOLBES/FINBES

The money received from the WOLBES is mainly meant for and has been spent on the salaries and other costs of the position of the Registrar and the reinforcement of the legal position of the Island Secretary. A contribution from the FINBES funds was also given to the employment of an interim manager in the Finance department.

Social Safety net

In 2014, the funds of the social safety net were mainly spent on training of the new salary admin person, employees of the electrical department in Public Works, Security, IT, airport staff, agriculture and social affairs departments. Several trainings have also been planned for 2015.

Queen Wilhelmina Park Upgrade

The second payment for the special purpose grant will be received in 2015.

Legal Support

Additional funding will be received in 2015 for legal support.

Library

A special-purpose grant was received from the ministry of OCW to improve the library function in Saba. The money spent in 2014 concerned the purchase of books and magazines and the digitalization of the library. The remaining money will be used to further expand the offer of books and magazines in 2015.

Donner money

During the visit of the then Queen to Saba, BZK promised a special-purpose grant of \$ 950,000. Half of this grant would be spent on taking care of arrears in maintenance and the other half on improvement of the administrative and financial administration.

The remaining money was used in 2014 for digitalizing archives and the last four months of the contract of the interim manager.

"Sociaal Kanstraject Jongeren" (Social Opportunity Project Young People)

In 2014 a special-purpose grant of \$ 211.485 was received from the ministry of Education, Culture and Science (OCW) for the project Sociaal Kanstraject Jongeren (SKJ). This project intends to give young people age 18 to 25 who do not have a diploma of a school for senior general secondary education or pre-university education or a diploma within the framework of the Adult and Vocational Education Act BES and no paid employment a social opportunity project that may lead to entering regular education or, if this is not possible, a suitable job.

The following amounts were spent on the project during the year:

Project management (incl. project bureau) \$ 99,223
Cost coaches \$ 52,177
Stipends students \$ 7,895
Costs MBO-1 \$ 58,066
Total: \$217,361

Werkmeester+

The overspending in this area will be covered by the special grant "Employment Opportunities Saba" in 2015.

4.9 Overview of use of the item contingencies

Over the entire year no movements took place in the item contingencies.

Overzicht onvoorzien	begroting	realisatie

4.10 Overview General Cover Funds

The general cover funds include the income which is not tied to a certain function or main function (e.g. free benefit). Therefore, this income is not mentioned under the individual functions. Income which is tied to a certain function is shown, in principle, under the function/main function within which the spending takes place. Transparency within the general cover funds is very important to the island Council. These funds are the most important contribution to the financial basis of the (multi-year) budget. The most important general cover funds are in the below table:

Overview General Cover Funds

Love	Budget	Realization	Realization	Difference	2014-2013
Levy	2014	2014	2013	Plus	Minus

Total Difference 2014-2013	-				65.037

4.11 General Remarks General Cover Funds

Motor Vehicle Tax

As seen in the table the vehicle tax for the year 2014 increased in comparison to 2013. This is due to the raise in the vehicle tax fee.

Daycare Fee

The total income for the parental contribution for daycare increased in 2014 due to stricter internal controls with the collection of the fees.

Building Levies

Due to the economic situation on the island, building activities decreased and as a consequence the building fees were temporarily adjusted. As such you can see in the table above that the fees in 2014 were lower to those in 2013.

Long lease and Building Rental Income

The total income for long lease and rental income slightly increase in 2014 due to the rental of the new fishermen's complex at the harbor.

Dividend

In 2014 the minimal dividend was charged to Satel NV whereas in 2013 it was decided to waive the dividend payment.

Free Allowance

This difference stems from over budgeting of the Vrije uitkering in the primitive budget.

4.12 Overview primitive budget and budget changes

Below please find the figures of the income and expenditure as primitive estimate with supplements/corrections made by means of the 1st, 2nd, and 3rd budget change. Budget changes have all been adopted by the Island Council and approved by Cft and BZK.

Annexes Financial Statements

1. Overview of staff and salaries

Explanation FTE

These are only the officials/contractors who were employed on December 31, 2014. The persons with whom an agreement was concluded for services (staff of third parties) were not taken into consideration in the determination of the number of FTE's. The statement of the amounts paid and the budget do include the costs of these agreements.

Controleverklaring van de onafhankelijke accountant

Aan: De Eilandsraad van het openbaar lichaam Saba

Saba

Verklaring betreffende de jaarrekening

Wij hebben de in dit rapport opgenomen jaarrekening 2014 van het openbaar lichaam Saba gecontroleerd. Deze jaarrekening bestaat uit de balans per 31 december 2014 en de staat van baten en lasten over 2014 met de toelichtingen, waarin zijn opgenomen een overzicht van de gehanteerde grondslagen voor financiële verslaggeving en andere toelichtingen.

Verantwoordelijkheid van het Bestuurscollege

Het Bestuurscollege van het openbaar lichaam Saba is verantwoordelijk voor het opmaken van de jaarrekening, alsmede voor het opstellen van het jaarverslag, in overeenstemming met het Besluit begroting en verantwoording openbare lichamen BES. Deze verantwoordelijkheid houdt onder meer in dat de jaarrekening zowel de baten en lasten als de activa en passiva getrouw dient weer te geven en dat de in de jaarrekening verantwoorde baten, lasten en balansmutaties rechtmatig tot stand zijn gekomen. Rechtmatige totstandkoming betekent in overeenstemming met de begroting en met de in de relevante wet- en regelgeving opgenomen bepalingen, waaronder verordeningen van het openbaar lichaam.

Het Bestuurscollege is tevens verantwoordelijk voor een zodanige interne beheersing als het noodzakelijk acht om het opmaken van de jaarrekening en de rechtmatige totstandkoming van baten, lasten en balansmutaties mogelijk te maken zonder afwijkingen van materieel belang als gevolg van fraude of fouten.

Verantwoordelijkheid van de accountant

Onze verantwoordelijkheid is het geven van een oordeel over de jaarrekening op basis van onze controle. Wij hebben onze controle verricht in overeenstemming met de Nederlandse controlestandaarden (NV-COS) en het Besluit accountantscontrole decentrale overheden (BADO). Dit vereist dat wij voldoen aan de voor ons geldende ethische voorschriften en dat wij onze controle zodanig plannen en uitvoeren dat een redelijke mate van zekerheid wordt verkregen dat de jaarrekening geen afwijkingen van materieel belang bevat.

Een controle omvat het uitvoeren van werkzaamheden ter verkrijging van controle-informatie over de bedragen en de toelichtingen in de jaarrekening. De geselecteerde werkzaamheden zijn afhankelijk van de door de accountant toegepaste oordeelsvorming, met inbegrip van het inschatten van de risico's dat de jaarrekening een afwijking van materieel belang bevat als gevolg van fraude of fouten.

Bij het maken van deze risico-inschattingen neemt de accountant de interne beheersing in aanmerking die relevant is voor het opmaken van de jaarrekening en voor het getrouwe beeld daarvan, alsmede voor de rechtmatige totstandkoming van baten, lasten en balansmutaties, gericht op het opzetten van controlewerkzaamheden die passend zijn in de omstandigheden. Deze risico-inschattingen hebben echter niet tot doel een oordeel tot uitdrukking te brengen over de effectiviteit van de interne beheersing van het openbaar lichaam. Een controle omvat tevens het evalueren van de geschiktheid van de gebruikte grondslagen voor financiële verslaggeving en de gebruikte financiële rechtmatigheidscriteria en van de redelijkheid van de door het Bestuurscollege van het openbaar lichaam gemaakte schattingen, alsmede een evaluatie van het algehele beeld van de jaarrekening.

De bij onze controle toegepaste goedkeuringstolerantie bedraagt voor fouten 1% en voor onzekerheden 3% van de totale lasten. Op basis van artikel 2 lid 7 BADO is deze goedkeuringstolerantie door de Eilandsraad bij raadsbesluit van 19 december 2013 vastgesteld.

Wij zijn van mening dat de door ons verkregen controle-informatie voldoende en geschikt is om een onderbouwing voor ons oordeel betreffende de getrouwheid van de jaarrekening en ons oordeel betreffende de financiële rechtmatigheid te bieden.

Oordeel betreffende de jaarrekening

Naar ons oordeel geeft de jaarrekening van het openbaar lichaam Saba een getrouw beeld van de grootte en de samenstelling van zowel de baten en lasten over 2014 als van de activa en passiva per 31 december 2014 in overeenstemming met het Besluit begroting en verantwoording openbare lichamen BES.

Voorts zijn wij van oordeel dat de in deze jaarrekening verantwoorde baten en lasten alsmede de balansmutaties over 2014 in alle van materieel belang zijnde aspecten rechtmatig tot stand zijn gekomen in overeenstemming met de begroting en met de relevante wet- en regelgeving zoals vermeld in het door de Eilandsraad vastgestelde controleprotocol voor de jaarrekening.

Verklaring betreffende het jaarverslag

Ingevolge het bepaalde in het Besluit accountantscontrole decentrale overheden vermelden wij dat het jaarverslag, voor zover wij dat kunnen beoordelen, verenigbaar is met de jaarrekening.
